The orientations of cytochrome *c* in the highly dynamic complex with cytochrome *b*₅ visualized by NMR and docking using HADDOCK

Alexander N. Volkov, Davide Ferrari, Jonathan A.R. Worrall, Alexandre M.J.J. Bonvin, and Marcellus Ubbink

In Figure 4, panels C and D, cytochrome *c* is shown as a mirror image. The correct figure is shown below.

Also, the net charges used in the HADDOCK calculations were +6 for cytochrome *c* and –8 for cytochrome *b*₅, contrary to those mentioned on page 803.

The authors apologize for any confusion these errors may have caused.
